

*In projecting the wells to a common line it was necessary to disregard the sea level datum and tie the horizons by seismic character. This does not affect the velocity calculations, it is only a graphical representation problem.

OPEN-FILE REPORT 79-1159
PLATE 5

Plate 5. Portion of USGS CDP seismic line 2 showing the relationship of major reflecting horizons to the lithologies of the COST No. B–2 and B–3 wells as projected along strike to the line.
