BATHYMETRIC MAP

GULF OF MEXICO
SIGSBEE ESCARPMENT EAST

Basic data information including bathymetry was compiled by the Hydrographic Survey Service (HSS). Bathymetry was compiled from NOAA navigation survey data (see notes) which comply with International Hydrographic Organization (IHO) Sounding Publication M-2. Accuracy standards for data used on the slope of the contour. As this map is not maintained through regular or alternate updates for depth and navigation and information, the product is not intended for navigation purposes. For navigation safety, users must use recent charts.

Chart projection varies from gnomonic to Mercator controlled by the Marine Management Service. Heavy lines indicate Lines of 1000 Fathoms (Controlled) and 2000 Fathoms (Controlled). The projections on this map are not for Federal listing purposes. For such purposes, refer to the OCS Offshore Production Diagram available from the Marine Management Service.

Vertical Datum: Mean Lower Low Water (MLLW) based on 1984-1985 observations from the location.
