

NOS NH 16-10 (OCS)

Base map information, including bathymetry, compiled by the National Ocean Survey from NOS hydrographic surveys.

Bathymetric contour intervals: 10 meters to the 200 meter depth, supplemented by 2 meter intervals, thence 50 meters to the maximum depth. Datum: MHW.

Universal Transverse Mercator Grid: Zone 18, 10,000 meter ticks (1) are shown on the map. Lack of tick mark data on portions of this map requires the use of generalized form lines to enter probable shape for contour or aliphatic shaped features that would otherwise appear truncated. The form lines are not on the prescribed contour interval.

Projection: Diagram data developed by the Bureau of Land Management. All blocks are based on the Universal Transverse Mercator Grid System, Zone 18 with X origin at 1,241,415.7 feet (380,000 centimeter units) at 87° West longitude and Y origin at 3,749 or 27 latitude.

The identification of the blocks is based on numerical sequences of N (North), Westing or Y (Y), and E (East) starting at Z = 0.

Example: N 1843 74.

The blocks shown on this Universal Transverse Mercator Grid are based on the Lambert Conformal Plane Coordinate System.

EVALUATION OF SURVEY ACCURACY

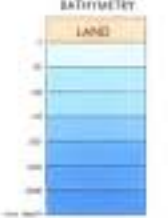

BLOCK NUMBER	SURVEY DATE	SCALE	SURVEY USE (INDICATE SURVEY TYPE)	HORIZONTAL POSITIVE (METERS)
14411	1977	1:40,000	ST-20	20.00
