

Day Solar Report:-- Northwestern Observatory, Spokane, Washington. (Single Unit Report)

Date: 15 August, 1958.

Times: 1955 — 2000 — 2001 — 2018 —
 Spectroheliograph,
 Projection

Sky Condition: Clear — Warm (92°)

Solar Limb: only fair

Apparatus Used: projection — Spectroheliograph (Ha) — no photos

Remarks: Observer: Parmenter —

General "lowered" activity + "smearing" makes photography of small benefit during these times
