

Date: 1 June, 1961

Observer: Parmenter

Times: 18:55 — 19:05 ut. ← "Plotter" → 19:08 — 20:10 ut. / p "Spectroheliograph" (H $\alpha$ )

Sky Condition: Clear, some wind, blue-grey sky / p

Solar Limb: very excellent / p

Apparatus Used: 7" Image Integrated-Light "Plotter" ↔ Spectroheliograph. (10" aperture, in H $\alpha$ )

Remarks: all limb material slowly modified over observing-period. much "tiny" material, of high contrast, between these more active "shown" objects (spicules, etc)
