

Date: 5 June, 1961

Observer: Parmenter

Times: 19:10 — 19:18 ut.  
"plotter"

19:20 — 19:50 ut.  
Spectrohelioscope (Ha)

Sky Condition: Clear, with fast-drifting clouds coming across, repeatedly/p

Solar Limb: fair, to excellent, by "spells"/p

Apparatus Used: 7" Image Integrated-Light "Plotter" ↔ 10" aperture Spectrohelioscope (in Ha)

Remarks: Most all features "holding" steady in activity amounts.  
Very little modification noted over observing-Period.
