

Date: 16 June, 1961.

Observer: - Parmenter

Times: 18:50 ————— 19:00 ut. ————— "Plotter" —————

19:03 ————— 19:50 ut. ————— Spectroheliograph - (Ha) —————

Sky Condition clear - Hot - Some - small - Haze / P

Solar Limb: fair — "heating", of some atms "bother" / P

Apparatus Used: 7" Image Integrated - Right "Plotter" ————— 10" aperture Spectroheliograph (Ha)

Remarks: Considerable "rapid-change" of "micro-filaments" about primary filament areas. Both too numerous + prolific to "keep up" with, or make permanent note of!
