

Date: 17 June, 1961. Observer: — Parmenter  
 Times: 19:00 ————— 19:06 ut. ←————→ 19:11 ————— 20:00 ut.  
 — "Plotter" ————— Spectroheliograph (Ha)

Sky Condition clear, with thin "wispy" cloud-streamers, about/p  
 Solar Limb: good — "streamers" bothered somewhat, now + again/p  
 Apparatus Used: 7" Image Integrated-Light "Plotter" ←————→ 10" aperture Spectroheliograph (Ha)

Remarks: "Very Bright" area near West Limb almost to "flare" stage.  
 S. 29° — E 90° "Inter-active" had quite rapid "shapes-change".
