Plotter Spectrohelioscope (H α)

Sky Condition clear - (Warm)

Solar Limb: Very good.

Apparatus Used: 7" Image "Plotter" — 10" aperture Spectrohelioscope (H α)

Remarks: Considerable limb-material, being either "quiescent", or very "slowly-changing". The N.32°/E.90° - "faint"-(?) could have been "eruptive" for earlier times, from general appearance.
