

Date: 16 October, 1968

Observer: Parmenter

Times: 18:45 u.t. "Plotter" 18:52 u.t. 18:53 u.t. 19:25 u.t.

Sky Condition: Clear (cold) (low 22°) Spectroheliograph → H α

Solar Limb: Poor

Apparatus Used: 7" Image "Plotter" - 10" aperture tower Spectroheliograph → H α

Remarks:

most H α bright regions appear of normal intensities, except the N.12°/E.90° "active" region - probable "flare" intensity

Red line indicates extent of "plaging" activity - levels, "moderate" (-)
