

Date: 24 March, 1969

Observer: Parmenter

Times: 19:50 U.T. — 20:00 U.T. — Plotter only

Sky Condition: clear (cold)

Solar Limb: rough (fluctuating image detail)

Apparatus Used: 7" image "Plotter"

Remarks:

Continued decay evidenced in spot-groups, though some of this being (now) produced through fore-shortened aspects of west limb progression.
